New version features improved search control interface, and it's easier to install. Script lets your visitors search through 8 search engines with just one mouse click. Users see real, not parsed, search results. Creates log file, so you can analyze what your visitors are looking for. Doesn't require any additional Perl modules and may be installed even by an inexperienced webmaster. The search is performed through AllTheSites, Alta Vista, Amazon.com, eBay, Google, Overture, Half.com and Yahoo.
