WebMerge generates static HTML pages from your exported database. Build catalogs, ezines, contact lists, image galleries and more, quickly and easily. Works with output from nearly any database or spreadsheet, including Microsoft Access, FileMaker Pro, Panorama, AppleWorks, and Excel. Use your favorite HTML editor to design custom templates for your index and details pages. WebMerge also lets you save its settings to a file that can start generating pages by just opening it, completely automating your workflow.
