A-Media Scanner will help you to catalog your multimedia library and publish it on the Web. This program gathers properties of audio and video files from media library and exports this data as Web pages, playlists, XML or other custom defined documents. A-Media Scanner gathers information such as duration, media types, codecs, video properties (size, framerate, bitrate, etc.), audio properties (bitrate, sampling rate, etc), content information (ID3 and ID3v2 tags, WMF ContentInfo, etc). It also automatically extracts sets of snapshots from video files and saves them in JPEG format Gathered data is exported in advanced Web pages (extracted snapshots are automatically linked in html documents), playlists (m3u, ASX, WSX , SMIL) or any other user defined documents. A-Media Scanner supports XSL and Java/VB scripts for custom data presentation. Package includes advanced samples for generation of HTML, ASP, WSX, etc. Supported formats: AVI (DivX, MS Mpeg4, H.263, Intel Indeo, etc), WAV, MPEG, mp3, ASF, WMV, WMA, Ogg.
