A menu for country fairs

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A menu with four group of courses (primi - secondi - controrni e dolci - bevande). Cash operator receives order, select the requested food, the script totals and print in A4 order for for waiters or kitchen. Menu items and prices are loaded form a configuration file (simple text file). Print functionality is tested on windows-Xp and default printer is used. On printed order there is space for image file (piede.bmp) that can be used for sponsors advertising. On site are present old php version and the new Python version. Author can also send, on request, a full tested self_consistant version embedded in portable python. My book "Diary of journey from PHP to Python" to document porting activity adventure is also available.
