

A pre-populated country, state, and custom select tag

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tag creates a custom select (drop down menu) with many flexible options. It lets you:
1. Choose to display a drop down menu of countries (pre populated for you!).
2. Choose to display a drop down menu of US states (pre populated for you!).
3. Choose a custom made drop down menu of a different set of options.
4. Add an option (item) or a list of options to the beginning of the list.
5. Add an option (item) or a list of options to the end of the list.
6. Choose a font color, font family, and font size for text in the drop down menu.
7. Choose onBlur, onChange, and onFocus events by passing the appropriate javascript code.
8. Pre define selected element in the list by default.
9. Select the size display (how many elements displayed at a time).
10. If you choose to display the pre defined country or state list, you can choose to exclude a list of options.
11. Choose a background color, font formatting (Bold, Italic).
So, you can use all the options you have for a normal drop down menu plus more.
