

AB Positive Encrypt and Decrypt Utility

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

MICROSOFT .NET FRAMEWORK REQUIRED This utility will allow you to encrypt or decrypt your ColdFusion templates. In addition, you have the ability to encrypt/decrypt entire folders, and sub folders. You can also use the FILE FILTER to only encrypt/decrypt certain file extensions. For example, let's say you want to omit all .jpg or .gif files, then you would enter in *.cfm in the FILE FILTER text area.
