Often customers, having added products to carts, do not complete their purchases. A simple reminder can increase your sales, and Abandoned Carts Alert Pro extension helps to accomplish this by sending abandoned carts alerts automatically. It will take a few minutes to set it up and after that it will automatically dispatch the alerts according to your settings. Alerts will be sent with a delay that you set. The extension sends reminders both to registered users and guests! Full list of features is available on the product page.
