

ABCMenuMan!

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ABCMenuMan! allows you to easily add special mouseover effects to your website. When you have more than a few animated GIF menu items, this loads much faster than animated GIFs. The full version does not pause for 1 second, nor does it list our website in the status bar or while loading. Plus, you can specify a background loading color, highlight color, add sound fx, use frames, specify font type, create your own animations with different sizes, plus a small construction kit is included. Two extra menus now included.
