AbleLogger Pro is a full featured site logging/statistics and visitor tracking program written in PHP4/MySQL. The streamlined interface provides real-time data hard to come by in many site stats packages. Very handy for tracking the effectiveness of commerce applications and for overall site security. Features include: Overview and Details displays, track visitor flow throughout site and time spent on each page, ability to search by IP, page viewed, or referer, extensive graphical statistics such as page views by hour/day/month, top referers, most popular browsers, and much more. Filtering options are also provided, as are database management tools and an auto-IP banning option.
