

ACart - Pro PHP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

We have received many calls from people who have tried to get Authorize.net's AIM and SIM PHP sample scripts to work for them, with no success! All these people wanted was a simple way to process their order with Authorize.net's gateway and get an email with the approval order. The same applies to the PayPal IPN sample scripts! Simple you would think right? Well as we all know nothing in life is simple or easy, But now it is with ACart - PHP Carts. As a Certified Authorize.net Developer I have created 4 carts to do the job for you, and the prices are Simple too! These Carts Can also be used to integrate into a larger program thus saving development time.
