

## Access Article Db

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Are you looking for a way to get news or articles to your web server quickly? Rather than creating unique .htm pages to display small amounts of text place it into Access. This sample application will hyperlink titles to recent articles, when clicked display the full content of the article and allow for the input of new information. This can be easily integrated into a template to provide quick publication of news on your site.
