

# Access To HTML

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This short example will allow you to dynamically create "static" html documents from an Access data on your web server using Active Server Pages. Basically after reading the contents of the db, instead of writing output to the browser it is written to the server.
