Access_user Class

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Access_user Class is an easy to use system for protecting pages and register users. They main features are: User-login, user registration, user update, remember login information, page protection, forgotten password recovery, mail based account activation and multi language message reporting and since the latest versions: maintain extra user profile information, access levels, a limited (safe) admin panel, manual account activation and an improved password check. The class is powered by MySQL and PHP sessions. Inside the package are examples for all primary methods. The latest version is a stable release and is used by a large community. Since version 1.92 custom session handler are supported.
