AccountHandler

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

AccountHandler is a powerful application for providing member registrations and password protected area administration for web servers using the .htaccess method of password protection. You can use it just as a member registration application, you can use it just as a password protected area manager, or you take advantage of all the powerful features combined as one.
