I have created a script which finds the best word combinations in the game Word Ace on Ace Casino. It will tell you how many points you will get and the best words for the highest points. Just download the 2 files from below and run the python script, you just have to enter letter:val pairs and it will generate the words for you. eg. 'e:1 e:-1 f:4 g:4 x:8 q:8 u:1 t:1' It runs in a loop so you can enter the new letters on each hand. I don't mind what you do with the script, share it around all you like, the more people know the better!
