Mobile Number	{value_mobile_number}
Email	{value_email}

Ad Banner Engine is a complete system to rotate banners across multiple sites. All logging is done using a MySQL database (required), and it provides daily stats, as well as historical stats. It can rotate an unlimited number of banners or you can use static banner code so the same banner is always shown or rotate multiple banners for a single link. It supports zones allowing you to easily display different sets of banners in different locations.
