Add authentication to your PHP pages the easy way

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This will enable you to add a login prompt that authenticates a user before he can see a page. No need to modify your code or pages. Simply download a file, and add a single line at the top of the page you want to add a login to. Any feedback is appreciated.
