

# Adding Records to a Database using SQL

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The purpose of this article is to show how to get records from an html form and submit that form to an ASP page. This ASP page will then use SQL to enter the records into the database.
