Email	{value_email}

A push-button controlled slide show with image captions and fader-effect image transitions. Cross-browser [NS4-7, IE-4&up] cut-and-paste script presents images in a slide show format, controlled by back, home, and forward buttons. Any number of images and captions can be used. Great for JavaScript newcomers, but a solid utility script, too. A download kit of the complete code and images is also available, free, on the site.
