

Advanced Website Creator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A web development environment that allows you to: - Build easily robust applications using an MVC framework and a MySQL/PostgreSQL/SQLite database backend. - Do all your application development inside Advanced Website Creator. No more editing arcane .xml files. - Improve positioning of your websites in search results by using search engine friendly URLs. - Take advantage of a database abstraction layer, that greatly simplifies database development. - Automatically use transactions when they are available for the target database engine. - Stop using include() and require() - library and user PHP classes are loaded automatically when used. Advanced Website Creator integrates with most popular PHP encoders. Full source code is available for the PHP runtime framework.
