New and Improved major release of the AgoraCart ecommerce platform. A full featured shopping cart system that is mobile ready and flexible for those needing more power and flexibility. Once your template is in place and customized as needed, store management can be done in the powerful online store managers. This is the first major update and release in 8+ years that improves every core code area and restructures the template & cart language/message systems. Features: Bootstrap CSS/JS framework support for rapid template development, new template widgets & dynamic placement, template editors, dedicated SSL/TLS and shared SSL support, image uploading, multiple sales taxes, online order management, UPS, FedEx, and USPS real-time shipping, unlimited custom shipping logic, handling fees, product options, flexible order forms, flatfile database with import/export functions, discount logic, static or dynamic product pages, product options editor, user fields for use in querying data and/or building dynamic pages, file updater/manager, and several real-time and manual payment options including Authorize.net SIM, PayPal IPN, NiftyPay, iTransact, and allows multiple payment options.
