

## aheadWorks' Frequently Bought Together

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The Frequently Bought Together Magento module takes its honored place in aheadWorks' set of perfectly-crafted Magento sale motivation extensions. During installation, the Frequently Bought Together extension turns off the Related Products block. By inserting a simple code in your CMS, you can choose where to display the module's content. Once embedded, Frequently Bought Together displays related products in a neat, comfortable and modern way, employing smooth and eye-catching AJAX and JavaScript effects. This extension not only enriches your store content by making it look Web 2.0, but it also attracts your customers. Consumers are encouraged to place additional products in their carts, increasing your cross-sells and total purchase amounts. From the AJAX side, the Frequently Bought Together Magento extension is powered by Pico JavaScript library, an in-house project of aheadWorks Co.
