

AI_ContactForm

Address {value_address}

Contact Person{value_contact_person}Mobile Number{value_mobile_number}

Email {value_email}

PHP Contact Form script to create a web page contact form, validate sender's e-mail address, check against e-mail injection attacks, and mail feedback to a specific addressee, without exposing that person's e-mail address to web-crawling spambots. Released under the terms of the GNU General Public License
