Ajax Cart Pro is a Magento Extension that allows users to add, remove and update products from your store in a much easy way, without having to reload the cart continuously using Ajax pop-up. This finds your customers an immediate solution to continue shopping without waiting for the pages to get refreshed. Ajax Cart Pro is compatible with Magento Community edition 1.6 and 1.7. In the front end, when a user clicks on the 'add to cart' button, a pop up will be displayed where the user can edit the quantity for added products by clicking on "Update" link. Likewise, customers can also delete the added product from cart without redirecting to cart page. Installing this extension is extremely simple.
