

AJAX Catalog

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Annoying page reloads can be forgotten. With the AJAX Catalog Magento module, your online store surfing becomes much faster and more convenient because your visitors see the whole list of category products immediately without refreshing the entire page. On the AJAX Catalog configuration page, just define the type of your store items displaying – the “Show More” button or auto-appearing list on scrolling – and your products will be automatically loaded on one page in the same way Google images do. With the AJAX Catalog Magento plugin, an online entrepreneur can create a dynamic and user-friendly catalog view.
