AJAX Name Suggestion Tool

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script will take information a user enters into a text field and shows suggestions for what the user could be entering. The script is brilliant for name fields and comes pre-populated with the 100 most popular boys and girls names in England and Wales as of 2004. The script can get possible matches from an array or from a database.
