

# Ajax Pagination

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Pagination is nothing but menu allow us to navigate a group of results much easier than simply dumping hundreds of results to a single page. A more manageable solution is to break the data up into smaller chunks to allow the end user to better view them. This method also allows for simple navigation through the result set quickly by allowing us to jump to any page of results.
