Akaar is really something different and new with PHP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

You can call this anything you like. What we can tell you is, it is an endeavour towards addressing few issues like mentioned above. We have tried to solve all this issue and also added few features that can really enhance the development work dramatically. It provides some interesting features like BackFire, Automated Client side Validation, Layout Management, Nice Error reporting and Handling, Controlling etc
