The AllWebMenus WordPress Menu Addin is a DHTML/JavaScript menu maker that lets you create any kind of popup or drop-down menus for your WordPress blogs/projects - no DHTML/JavaScript menu experience needed. Create cross-browser menus that work alike in all browsers supporting DHTML by fully customizing them through available menu properties (i.e. css menu properties), themes, effects (i.e ajax menu effects), styles (slide/floating menus), etc. The AllWebMenus WordPress Menu Addin add-in is designed to retrieve information from your blog (such as posts, pages, etc.) & import it into the AllWebMenus application to create stylish, feature-rich navigation menus based on its structure! Along with the AllWebMenus application, it creates any cross-browser, popup or drop-down web menu for your blogs/project that works alike in all browsers supporting DHTML held by all popular platforms (Win, MAC, Unix) and browsers (IE, Firefox, Mozilla, Safari, etc.).
