

Altavista Search Engine In Your Links Bar

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a JavaScript code snippet to send a query to AltaVista Web site. You can drag the link onto the Links bar of the browser, and use it as a quick search link bar. By modifying the value of location.href and the other querystrings, this can be extended to any search engine, since most search engines use only GET method to initiate searches.
