

Amazing Interactive No-Layers Menu Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A fully interactive menu system with separate messaging box and programmable elements, including: link color and behavior; link box motion indent; link box border colors; link box border styles; link box border width; individual link messages; and default link message. Designed to replace costly Java applets that perform similar functions, the scripting uses no layers or divisions. Recently updated with smoother mouse response.
