

Analogue Countdown Timer 01 AS3

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The analogue countdown timer counts down the remaining time until a preset date/time. The comparison is made between this set time and the user system time. The component is highly customizable directly from the xml and is written in clean ActionScript 3.0 code with comments. Sounds can be disabled if you want, you can change all the colors, you can use the whole countdown timer as a link. It also has a "finished" state with customisable text of course. You can resize the file by embedding it in a smaller or larger size in html or simply resizing it within your flash project. ...and many more
