

Andromeda Streaming Jukebox (PHP)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Andromeda turns your collection of MP3s into a fully-featured streaming Web site with dynamic playlist generation. Many other formats are supported, including: WMA, OGG, MPG, AVI, WMV. It's great as a personal jukebox, on a local network, and over the Internet (bandwidth permitting). Additional features include skins, custom playlists, logons/accounts, and a search tool. Andromeda is also multilingual, speaking English, German, Swedish, Dutch, Spanish, and other languages. No database is required. Works with PHP-Nuke and Post Nuke as a module or an add-on. ASP and PHP versions are available.
