Animated Text script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The script will allow you to call a function to animate a bit of text already on your page. The text will animate by having a "highlight" character of specified color move up and down the string. Good for a subtle sparkle effect. Much more eye catching than bold text, much less annoying than blinking.
