

anthericaMail

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

anthericaMail combines a user-friendly interface with top quality informative features. Unique emails, categorised by user-definable groups are checked at server level, every exception is flagged and excluded by the mailing lists, reducing the risk of bounce-back messages. Its statistics reporting system makes it a very effective web-marketing tool: rate of visualizations and who visualised the message. Contacts who clicked links, banners or downloads. Graphs for the most relevant reports.
