

ArAutoSummarize

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This class can be used to automatically extract key phrases to summarize an given Arabic text. The class can parse a long Arabic text and use stemming and ranking algorithms to identify which can the be the most important keywords than can be used to summarize the text. It can also mark the text to highlight the keywords along the given text for presentation in an HTML page.
