ArchCommerce ASP.NET Commerce server is a scalable business-to-consumer (B2C) shopping cart application that may help your global business to sell online. It has advanced and intuitive backoffice suites that allow you to easily manage your product catalogs and ensure on-time delivery of products. Commerce Server also supports multi-languages. Commerce Server is entirely written in C# and ASP.NET. C# is a modern object-oriented programming language. On the other hand, ASP.NET is the next generation of Active Server Pages(ASP) that provides dramatic improvements that enhance application performance, security, reliability and deployment.
