Art.com Data Feed Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This PHP script processes the data feed offered by the Art.com affiliate program and displays it on your site. Allows users to browse through over 75,000 products in 8,000 categories offered by Art.com. Users can perform keyword searches for posters directly from your site. The most popular products and the most recently added products are automatically displayed on the home page. Featured products are randomly selected and shown on the home page and on each category page. The data feed is automatically and quickly imported into a MySQL database. The output can be completely customized using templates and style sheets to seamlessly match the look and feel of your site. Produces pages with search engine-friendly URLs using .htaccess/mod_rewrite.
