

Article Randomizer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A simple program that executed using SSI. It will read from your directory and generate number of links to show based on your request. No need to maintain seperate text file. Features include, random text link + description, show all files and show last modified files. Look at the demo via my website.
