

ArtistScope Link Protect

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Originally created to prevent bandwidth and link piracy, Link Protect can manage downloads of your pages and images. If the call is not from within your site or an authorized site, a customizable default image is displayed. The links in your protected folder are undetectable and safe from searches and hack visits. You can specify domains from which you will accept links such as your other sites or those of authorized associates. Almost any type of file can be protected with Link Protect - gif, jpg, zip, html, exe.
