

AS3 Date Picker

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This date chooser is a welcome addition to your project. There are tons of ways you could use this, it's all up to you. It has two skins (a black and a white one). It's very easy to use and implement, written in neat Actionscript 3.0 code. Settings you can change in the XML : - date chooser opened when loaded on/off - initial selected date - button colors (normal, mouseover, selected) - window X axis initial and final positions - window Y axis initial and final position - animation time - animation type (ex. linear, bounce etc.) Enjoy this new release from Oxylus Flash.
