

Asbru Web Content Management for ASP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Out-of-the-box, full-featured database-driven web content management system designed to provide control and simplicity for non-technical users while maintaining flexibility and power for developers. Enables users to create, publish and manage websites with advanced, dynamic end-user and website administrator functionality. Includes advanced WYSIWYG editing, custom data search and display, workflow, staging, scheduling, automatically generated content lists, advanced scripting, personal workspace and access permissions for website administrators as well as for visitors. Example usage: Create a multi-lingual website and Extranet and Intranet websites with custom data, user registration, message boards, discussion forums, weblogs and email newsletters. Manage the website with multiple administrators with differentiated access restrictions and publishing workflow processes. Includes open program source code for unlimited customisation and integration with other systems.
