

# AskApache Password Protect

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This plugin allows you to setup password protection for your blog using either HTTP Basic Authentication, or you can choose to use the more secure HTTP Digest Authentication. The power of this plugin is that it creates a virtual wall around your blog allowing it to stop attacks before they even reach your blog to deliver a malicious payload.
