

# ASP 101: Guestbook

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

This is a simple guestbook program that takes a user's input gets, writes to a text file with HTML code wrapped around it and show the comments by including the text file into the script. It also allows you to delete all comments at the first load of the page after midnight or to empty it completely.
