

# ASP Expert Obfuscator

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Protect your intellectual property by obfuscating your ASP code, so that the code remains executable on the IIS server, but cannot be changed or extended by your customers. This is the only tool that applies an XMLHTTP based self test to every asp file changed. Goal is to guarantee, that the resulting code will always run perfectly. ASP Expert Obfuscator 1.0 itself is written in ASP, it consists of one script only which contains all necessary methods. Obfuscation methods supported are: Include file resolving, file renaming, HTML/VBScript/Javascript comment removal, indent-adding, code-merging, function- renaming, HTML-encoding, free pattern-replace definition, garbage code creation, garbage file creation, MS script encoding.
