ASP Form Input to HTML

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The author writes "ASP has the ability to write .html or any other text based documents directly to a web server (You need to write the text output to a directory that has write authority). This enables the instantaneous publication of user input without the need for uploading files from a PC." This example code shows how to write text based documents to a server using ASP.
