

ASP Form to Email

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ASPForm2Mail send the contents of any HTML form inside an email. The form fields are identified automatically without hand coding required. This script is presented as a Dreamweaver Extension and can be used visually from the Dreamweaver menu. Forms with uploads are also accepted, the uploaded files are sent as attached files into the email. There are no external plugins or components required, this is a 100% ASP VBScript tools. Includes automatic country identification based on an updated IP-to-Country database. Emails are sent with the standards CDONTS or CDO SYS components (automatic configuration).
