

# ASP Hit Counter

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This is a simple ASP hit counter. A text document is placed in the same directory as the page we want the counter to appear on. The .txt file is first read to gain the value of the last hit count, one is added to that number, written to the .txt document, closed and the counter value is written as text to the page.
