

# ASP HTTPSSL Secure Socket Component

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

HTTPSSL is a high performance component developed in VC++ to send and receive web pages through HTTP or HTTPS (secured connections via SSL). HTTPSSL has been tested over hundreds of thousands of requests and is well suited for use in high stress ecommerce environments. HTTPSSL is server safe and does not use or depend on wininet.
