ASP Image Gallery is an ASP based gallery script designed for easy displaying image galleries in the ASP web applications. It is an easy to use, file-based, image gallery script. It is also a highly configurable application that automatically generates fast thumbnail indexes of a folder structure. This robust ASP Image Gallery can be integrated seamlessly with your ASP applications. You can use ASP Image Gallery to quickly develop great looking slide shows and image galleries. The ASP Uploader in Image Gallery allows you select and upload multiple image files and cancel running file uploads, add new files during uploading. It also supports client side validation of the file size/type before uploading.
